

# Building with LLMs: The Developer's Handbook

## Table of Contents

|                                          |          |
|------------------------------------------|----------|
| Dedication                               | Page 3   |
| Preface                                  | Page 4   |
| How to Use This Book                     | Page 6   |
| 1. Introduction to Generative AI & LLMs  | Page 8   |
| 2. The LLM Landscape                     | Page 20  |
| 3. Working with LLM APIs                 | Page 33  |
| 4. Model Capabilities & Limitations      | Page 50  |
| 5. Prompt Engineering Fundamentals       | Page 64  |
| 6. Prompting Techniques                  | Page 81  |
| 7. API Parameters & Output Control       | Page 99  |
| 8. Prompt Iteration & Evaluation         | Page 113 |
| 9. Conversation Design & Multi-turn Chat | Page 127 |
| 10. Embeddings & Vector Databases        | Page 142 |
| 11. Retrieval-Augmented Generation (RAG) | Page 157 |
| 12. Security & Guardrails                | Page 173 |
| 13. Cost, Latency & Error Handling       | Page 187 |
| 14. Ethics, Bias & Evaluation            | Page 203 |
| Appendix A: Hands-on Labs Reference      | Page 221 |
| Appendix B: Capstone Project             | Page 224 |
| Appendix C: Setup & Installation         | Page 225 |
| Appendix D: Further Reading & Resources  | Page 226 |
| Appendix E: Diagrams Reference           | Page 227 |
| About the Author                         | Page 229 |
| Index                                    | Page 230 |
